

013610

**Control center software CD WINMAGplus basic kit**

WINMAGplus control center software CD for hazard detection systems, license not included, compatible with Windows XP Professional SP2. With the aid of this basic software and the corresponding licenses, hazard detection systems can be operated and managed via PC. Hazard reports are indicated in text form and graphically. In this way, the PC can also be used as an electronic emergency control point. As of WINMAG version 10, this version can be used as an upgrade (only for existing WINMAG versions 6 or older).

For demonstration purposes only, the WINMAGplus basic version operates without a license as a full version for a total of twenty 8-hour days, after which the program switches to offline mode. After expiry of the test time, all connections to all components are cut off. Starting in offline mode does not reduce the number of test runs. The demo mode is a full-function editing environment. All components function except the online communication. Each process can also be tested in demo mode through simulation and all editing functions can be used.

Please use order form printed in the catalog.

You can also download this software free of charge from our protected download area at www.esser-systems.com.

Basic Licenses

013631

**Basic license for WINMAGplus USB port**

This basic license is used to activate the basic software package/demo version to operate as unrestricted visualizing software for server workstations and for network clients. For interfacing control panels to server workstations, further licenses are required (see 013601 – 013606, 013608, 013611, 013613, 013625).

Please use order form printed in the catalog.
