

ARF-100

SITE SURVEY TOOL FOR ABAX SYSTEM

ABAX system is designed as a wireless expansion for any hardwired control panel. Unique technological solutions used by SATEL's engineers ensure the highest possible security level for a wireless system.

FEATURES

- checking the level of radio signal received by controller from tester, or by tester from controller
- simulating radio communication of devices to be supplied from battery or external sources
- LED indicator showing the radio signal level

TECHNICAL SPECIFICATION

Working frequency band	868.0 MHz + 868.6 MHz
Power supply	alkaline battery 9 V 6LR61
Working temperature range	0°C...+55°C
Dimensions	70 x 196 x 32 mm
Weight	137 g
