

Features

- 1 Holes in the side rail**
Specially designed to fix bonding jumper or grounding clamp.
- 2 Security edge**
Rounded edge that avoids damaging the cable when they are installed in the trays.
- 3 Cable saving rib**
The union between two cable trays is protected by a rib that avoids damaging the cables when moving them.
- 4 Central holes**
For easy cable tying and make pathway.
- 5 Snap-on cover lid**
Thanks to the rounded edge, the cover lid is fixed to the tray without additional clamps.
- 6 Self-assembled system**
Does not need union joints or screws for the connection between cable tray straight lengths.
- 7 Versatility**
The tray is symmetrical improving both cutting the tray and supports mounting.
- 8 Threaded rod holes**
Located in central positions, to improve balance when installing the threaded rod.
- 9 Cross perforations for mounting**
With a high number of central and lateral perforations to improve the cable tying and mounting of supports.
